# SCHAFFNER's Compagny

YESTERDAY AND TODAY,

## 7 GENERATIONS

OF BLACKSMITHS AND METALWORKERS.

It was in 1812 that everything begins for SCHAFFNER institutions.

203 years of existence, commons passions, technical evolutions and mastery of a craft of art recognized and shared over generations.

The same desire has dominated then without ever weakening. From a simple anvil to the digital machine, we kept the role of the man and his experience to ensure a perfect execution of all achievements we manufacture for you.

## COMPANY'S SKILLS

Company's guarantee of reliability as well as men who compose it, we had to certify our skills and label our know-how to guarantee the quality of our achievements:

- Quality process according to ISO 9001,
- Certified QUALIBAT (Metalwork Technicality Superior. - Ref 4413, Metal Structure. - Ref 4421, Ironworks. - Ref 4432, Art Ironworks. - Ref 4493)
- Labeled « "Entreprise du Patrimoine Vivant" (Living Heritage Company).

The French and European standards which meet our products and a systematic and rigorous monitoring of our production enable a reliable and consistent quality.

## SALES DEPARTMENT

SCHAFFNER has adapted its approach in order to remain close to its customers and more responsive to their needs!

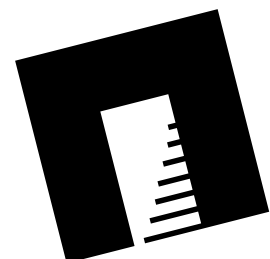

A dedicated, specialist contact person will handle in-house every aspect of your project. His or her role is to coordinate the activities of all our departments in real time, in order to guarantee the fast delivery of a finished product that perfectly complies your specification

## ENGINEERING AND DRAFTING DEPARTMENT

The SCHAFFNER Engineering and Drafting department works in close collaboration with our Sales department. This guarantees you access to a specialist contact person whenever you have a question and for each specific product that we offer. The role of our Engineering and Drafting department is to advise and inform you, ensuring that our products are a perfect match for your needs.

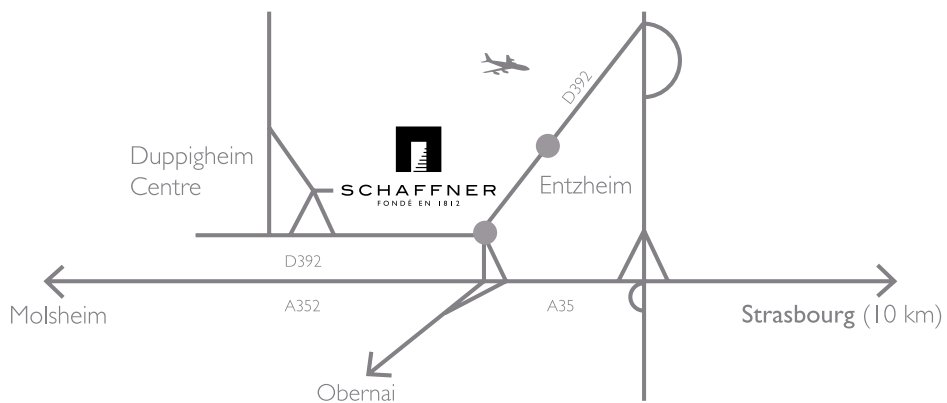

Every study is based on the drawings you provide us with, or drafted by one of our engineers with a constant desire to adapt our way of working to yours. Our computer tools and software programs offer great flexibility in the integration of your data (ALLPLAN, DXF, DWG), in our information system. SCHAFFNER also has a team of R&D engineers focusing on the development of three main areas:

- Development of new products in response to market demands,
- Optimization of production process design, both for productivity and quality,
- Quality control in response to current and future standards.
