7 GENERATIONS OF BLACKSMITHS AND METALWORKERS

The story first began in 1812 for **SCHAFFNER** institutions, in a simple family workshop in a village in the East of France.

210 years later, the same shared passion has, hand-in-hand with technical progress, given way to the mastery of a craft which has been handed down over generations.

The level of passion, dedication and personal investment that makes our work unique has never wavered. From a simple anvil to a digital machine, the process is still as carefully curated with the skill and specificity to ensure the perfect execution of all of our designs.

w has been procuring Architects and Interior Designers on high end projects first in France and all around the world : Ironworks, Fine Metalworks and Monumental Staircases .

We are also partnering with Artists and Designers to manufacture and finish artworks and furniture. Combining traditional know-how such as blacksmithing and modern techniques like CNC machining, our team of experienced and passionate craftsmen and engineers take each project as a unique opportunity to develop new solutions in achieving the exceptional quality expected by our refined clientele.

Our teams have acquired their experience working on prestigious commissions from all around the world, from wrought iron restoration projects to decorative contemporary metalwork.

In the process, **SCHAFFNER**, which was awarded by the French government the label of “Entreprise du Patrimoine Vivant” (Living Heritage Company), takes pride in passing on its savoir-faire to younger generations of metalworkers
